## **SCAN COUNT**

### SC-150

#### **VALUE / SORTING MACHINE**

Flexibility is vital in today's world. As cash processing demands change and technology evolves, being able to scale operations up or down and take advantage of new opportunities helps organizations stay productive and cost effective.

Designed compact and modular, SC-150 is ideal for rapid cash processing where space is limited. It has a standard throughput of 1,200 banknotes per minute or 72,000 notes per hour with a large feeder capacity of 500 notes and continuous feeding for efficiency. In dual pockets modules, cash can be segregated easily by denomination, orientation, series, size or condition. Dynamic pocket allocation automatically allocates pockets, optimizing pocket usage and throughput

- 3.2 InchTouch Screen
- Full Open able Design
- Full MG Sensor Covered
- Static Electricity Erase Design
- Serial Number Reading
- Auto Currency Detection
- 30 Currencies (Auto Detection)
- 110+ Kinds Of Currency Database
- Counting & Sorting
- Silence Counting Design: About 70db

# SCAN COUNT

## TECHNICAL SPECIFICATIONS

1+1 pocket mix value / sorting / counting machine
Roller Friction System
Touch Screen
Dual CIS, Magnetic, Infrared, Ultraviolet
Yes
30 Multiple Currencies
Image Detection, Double Detection, IR, Chain Notes Detection
110+kinds of currencies
Contact Image Sensor
Allows Cumulative Counts
800/1000/1200 notes/min
500 pcs
